 **TearJoy** Presents

EYE-CARE DRY

Hydrating **Cleansing Wipes**

Optimal Care of Eyelids and Lashes

Complete your treatment regimen with **Professional Ophthalmic-Based Wipes**

Hygienic Cleansing Wipes

Optimal Care of Eyelids and Lashes

Exclusive Ophthalmic Technology

Fischer Pharmaceuticals has exclusively developed Dr. Fischer Eye-Care®, ophthalmic based cleansing wipes for hygienic care of the eyelids and lashes. The product undergoes a purification process taking the production standards to the highest levels. Dr. Fischer Eye-Care® pre-moistened towelettes contain a soothing ophthalmic solution that is formulated to the natural pH of tears. Dr. Fischer Eye-Care® towelettes employ a special embossed texture technology for enhanced surface cleansing of the eye surrounds. This technology optimized innovation can be applied for both daily and medical usage, ensuring a safer and more effective care.

Optimal Ophthalmic Care

Non-ophthalmic based wipes may cause irritation, especially in disordered eyes. Many ocular conditions, such as Blepharitis, may become more severe by irritation; it can be a postponing factor in the healing process. Dr. Fischer Eye-Care® is especially designed to suit a variety of eye conditions. It does not contain preservatives, potential irritants (colorants and fragrances) and has been clinically proven as non-irritating and non-stinging.

Safe and Eye-Friendly

Suitable for the most sensitive eyes, Dr. Fischer Eye-Care® Cleansing Wipes effectively dislodge, dissolve and remove mucous deposits and sticky discharge that may form at the base of the eyelids and eyelashes and present a continuing source of infection.

Dr. Fischer Eye-Care® Cleansing Wipes have been tested and approved as hypoallergenic, tearless and are enriched with soothing Chamomile extract. Dr. Fischer Eye-Care® is an exceptionally large wipe, soft and embossed for the delicate areas of eyelids and lashes.

Updated to the Latest Ophthalmic Trends and Requirements

Tested and recommended by Ophthalmologists and Dermatologists. Dr. Fischer Eye-Care® is a league of its own in eye health protection.

- Rinse-Free
- Tearless
- Preservative-Free
- Hypoallergenic and Sensitive-Approved
- Adjusted to the natural pH of tears
- Soothing Chamomile extract
- Innovative ophthalmic technology

Complementary Aid to Medical Treatment

Common Eye Conditions:

- Blepharitis
- Conjunctivitis
- Hordeolum
- Dacryocystitis
- Hay Fever Allergy
- Hygienic Care Following Clinical Procedures.

Advantages of Dr. Fischer Eye-Care®:

- Soothes the eye surrounds and helps keep the eyelids and lashes free of crusts, scales, and residues.
- Non-irritating wipes, helps prevent ocular conditions from worsening. Cares and helps prevent discharge of tear duct purulent secretions.

Daily Uses of Dr. Fischer Eye-Care®:

- **Contact lens wearers** - cleans the eyelids and lashes of residues and helps maintain strict lens hygiene.
- **Computer Vision Syndrome (CVS)** - helps relieve irritation and eyestrain due to glare and long hours of focusing the eyes.
- **Dry eye syndrome** - helps maintain the function of tear spreading and protects against dryness. Using Dr. Fischer Eye-Care® wipes may assist in reopening the meibomian glands allowing them to secrete oils thereby relieving symptoms.
- **Make-up remover for sensitive eyes** - gentle and effective cleansing of the eyelids and lashes.

DIRECTIONS

General Cleansing of Eyelids and Lashes

1. Prior to treating the eye area ensure that your hands are clean.
2. Open the sealed pack and remove the wipe.
3. Use a separate wipe for each eye.
- 4.* Remove all mucous secretions and residues from the eyelids and lashes by wiping in a downwards direction. Make sure to clean in between the lash and corners of the eyelids.
5. Do not reuse - dispose of wipe in a suitable container.

Warm Compress

1. Prior to treating the eye area ensure that your hands are clean.
2. Without removing or opening the pack, soak a Dr. Fischer Eye-Care® Wipe in a container of hot water for a few minutes. Note: Do not heat the wipe if the pack is open.
3. Remove the wipe from the pack and ensure that it is not over hot before use.
4. Place the wipe over the closed eye for a few minutes and then wipe the eyelids and lashes as directed (4*). Dispose of wipe in a suitable container

To use Dr. Fischer Eye-Care® as a cold compress, store sealed pack in the refrigerator (4°C).

Fischer Pharmaceuticals Over 50 Years of Innovation in Eye Care

Fischer Pharmaceuticals has been involved in the R&D and manufacture of sterile ophthalmic medical preparations since 1965. These products are in routine use by ophthalmologists and medical practitioners in clinics and hospitals.

Dr. Fischer Eye-Care® Wipes are the result of the company's expertise in visual health medication and specialization in sterile ophthalmic preparations.

Fischer Pharmaceuticals innovation in formulation and application of sterile ophthalmic preparations as well as complementary eye-care treatment products has benefited countless numbers of eyes for almost five decades.

APS - Age Protection System

Fischer Pharmaceuticals manufacture products that incorporate the innovative Dr. Fischer Age Protection System; a state-of-the-art healthcare treatment concept that is reflected in the company's most successful and original product ranges.
