

Eyes Alive

Beryl Bouttell of **Eyes Alive** manufactures custom-designed, individually-crafted and hand-painted ocular prosthetics - or, if you like, artificial eyes. The fact that Beryl makes these artificial eyes by hand, from an impression taken of the patient's eye, guarantees that they offer the best comfort and movement. Painting them by hand promises the best colour-matching available in the field of ocular prosthetics. And these artificial eyes can usually be made in just one day, to avoid patient trauma.

Beryl makes eyes to attach over coral and all other implants. A professional, friendly and caring environment ensures Beryl upholds her working motto: Striving for excellence with each patient. Phone Beryl at [REDACTED]
